Professional Summary

Computer Engineering undergraduate with internship experience in AI development, multi-agent orchestration, and workflow automation. Builds Python APIs, LLM applications, and full-stack systems, with research experience in natural language processing.

Technical Skills

Languages: Python, JavaScript, SQL, HTML/CSS
AI & Automation: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), multi-agent systems, LangGraph, LangChain, prompt engineering, n8n, Ollama
Machine Learning & NLP: Scikit-learn, PyTorch, Hugging Face, Sentence-BERT, NLTK, pandas, NumPy
Backend & Web: FastAPI, Flask, REST APIs, Server-Sent Events, Playwright, React, Next.js, Tailwind CSS
Data & Tools: PostgreSQL, Supabase, SQLite, Pinecone, Git/GitHub, Vercel, Twilio API, Telegram Bot API

Education

Vidyavardhini's College of Engineering and Technology 2024 to 2028
Bachelor of Engineering in Computer Engineering CGPA: **9.22/10**
Ranked first in first-year engineering (2024 to 2025) with a **9.48/10 CGPA**.

Experience

Surfboard Ventures June 2026 to Present
Developer Intern; previously AI Agents & Autonomous Systems Intern

- Develop **EdQuest's AI engine** to generate personalized courses from psychometric learner profiles, implementing assessment scoring, content branching logic, streaming generation, and a multi-tenant data model.
- Built an n8n automation workflow and an LLM founder orchestration system during a two-week internship; received **Best Project awards in both weeks** and was selected for a subsequent Developer Intern role.

Hexamad Digital March 2026 to June 2026
AI Systems & Automation Intern

- Completed practical training in n8n workflow automation, AI agents, prompt engineering, and API integration.

Projects

Maestro.ai: Developed a six-agent GPT-4o pipeline using LangGraph and FastAPI to generate startup plans; integrated Server-Sent Events, Pinecone vector memory, and GitHub/Notion APIs.

Axon: Engineered an AI output validation API with schema validation, GPT-4o-mini semantic evaluation, and policy checks; implemented fail-closed guardrails across 11 n8n workflows with Next.js and PostgreSQL.

North Star / SatQuery AI: Led development of a GeoChat-7B satellite imagery assistant for visual question answering, image captioning, and grounding, using LangGraph agent routing and FastAPI.

IntelliTrail: Implemented Scikit-learn price forecasting using SMA, RSI, and ATR indicators, adaptive trailing stop-loss logic, and multi-bot portfolio simulation with a React/FastAPI dashboard.

Adhikaar-Setu: Developed a Flask/React platform matching farmers to government schemes; automated application forms using Playwright and Twilio WhatsApp consent with user-completed OTP verification.

SocioGate: Developed React resident and security portals with Supabase/PostgreSQL real-time synchronization for visitor management, guest authorization, parcel OTPs, vehicle records, and emergency alerts.

ML Approaches for Comparative Literature: Implemented Python and Scikit-learn NLP pipelines for text preprocessing, feature vectorization, and analysis of writing styles, themes, and textual similarities.

TSL Agentic AI Bot: Designed an eight-agent n8n trading workflow integrating market data, sentiment analysis, risk controls, Dhan API order execution, trailing stop-loss logic, accounting, and Telegram alerts.

Publications

Machine Learning Approaches for Comparative Literature, IEEE conference paper, February 2026.
Echoes of an Endless Sky, *Shattered Seasons* anthology, August 2025.
Data Means Drama: Machine Learning and NLP Approaches in Comparative Literature, book, July 2026; expands on the IEEE paper above.

Honors & Awards

2nd Prize, All-India n8n Workflow Showcase. **Best Speaker**, FaceOff 13, VCET (Jan 2026).
National AI Olympiad 2025 (Accenture TalentSprint): All India Rank **364**; Maharashtra Rank **60**.
